DETAILED ACTION

Allowable Subject Matter

1. Claims 1 and 28-34 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art does not teach or fairly suggest that wherein each of the first stage switching elements is configured to repeatedly sequence through the flow control information currently stored in the storage mechanism and to send a portion of the flow control information stored at a current location over one of the paths to a predetermined one of the plurality of second stage switching elements, such that each of the first stage switching elements is configured to send the flow control information to a different one of the plurality of second stage switching elements, as specified in independent claims 1 and 31.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Lenoski et al (US Patent No. 6,735,173 B1) discloses method and apparatus for accumulating and distributing data items within a packet switching system.

Art Unit: 2667
